Have you been told that your carousel is no longer supported or obsolete?  
Are you having a hard time finding the parts you need to keep you up and running?

**With a Chameleon Carousel Controls™ solution from SJF,  
your carousel can be up-to-date and operational again!  
With prices starting under \$9,000.**

Chameleon Carousel Controls™ from SJF are designed to work with ANY  
vertical or horizontal carousel - regardless of make, model, age or size.

**Comes  
with 8"  
Color TFT  
Touch Screen**

*What is a Chameleon Carousel Controls™ solution from SJF?*

**Chameleon Carousel Controls™ use  
commercially available components combined  
with sophisticated software techniques to  
make your carousel fully operational.**

We have a fully operational solution for you,  
based on **your** equipment and **your** needs.  
We replace the components necessary for a working  
system. This includes, controls, motors, motor drives,  
encoders, proximity switches, photo eyes, power supplies,  
human machine interface and more.

**A Chameleon system consists of controls,  
motors, devices, and a touch screen interface.**

*What can I expect my Chameleon Carousel Controls™ system to do?*

You can expect the functionality of a basic system to operate the carousel in both automatic and manual modes, as well as display error conditions to help resolve running issues.

- **Select a Bin Location to Automatically be brought around**
- **Run the carousel in Manual or Jog Mode**
- **Diagnose error conditions**
- **Manual Bypass Operation**
- **Automatically "Home" the carousel** (encoder type carousel)
- **Position the carousel at any location** (proximity type carousel)

A User Manual and an Admin Guide are supplied.

*I need to do more. Do you have carousel storage and retrieval software available?*

**Yes we do! Starting at just \$1,495**

**You can run your carousel system on a PC  
with a Sure-Pik™ Software Solution!**

- Part Number Database Search and Retrieve
- Part Image for more Error Free Picking
- Screen Text and View Options
- Multiple User Accounts
- Pick, Replenishment, Cycle Counting
- Diagnostics
- Microsoft SQL Server Database Engine

**See Sure-Pik™ Software brochures for more details.**

Note: You can start out with a basic Touch Screen solution, then upgrade to a Software Solution later.
